

Sustainable and Organic Vegetable Pest Management Field Day

Disease and Weed Management Research Trials

Tuesday, August 29, 2017 | 3:00 PM – 9:00 PM

Cornell Vegetable Program's Research Site at the Cornell Lake Erie Research and Extension Laboratory, 6592 West Main Road, Portland, NY 14769

The Cornell Vegetable Program is hosting the 2nd Annual **Sustainable and Organic Vegetable Pest Management Field Day** on August 29, 2017 at the Lake Erie Research and Extension Laboratory in Portland, NY. Cornell faculty, Christine Smart, Steven Reiners, Thomas Björkman, and the new associate professor John Wallace, along with CVP Extension Specialists will be leading research site tours and answering questions on sustainable pest management options for fresh market vegetable growers. *DEC and CCA credits will be available for portions of the day.*

Topics:

- Come Meet the New Associate Professor John Wallace and Learn about his Plans for Weed Management Research in Vegetables
- 2017 Vegetable Disease Update and Tour of Organic Weed and Disease Management Trials
- Insect management and Specialty Crop Vegetable Variety Demonstration
- Update on NEWA
- Sulfur Fertility in Vegetable Crops
- Using Cover Crops for Soil Health
- NE Broccoli Project Update
- Season Extension
- Sweet Corn Variety Trial and Tasting

A key component of this event is the support provided by industry organizations. Contributing organizations will be recognized as an integral part of this dynamic event. We have an opportunity for sponsorship.
