

Red Noodle Bean

One of the Many Asian Long Bean Varieties

- Grows like pole bean but needs to be secured to trellis. Needs trellis to produce long straight beans
- Long season to grow with most beans coming in August
- Needs warm moist conditions and good fertility to start and more added as flowers turn to beans
- Red or purple variety grows well in WNY
- Pick when pods are 12-16". Can grow longer but beans can get tougher

- Heavy feeders
- Provide pre-plant fertility
- Come back with side-dressed N
- Or fertigate through trickle
- Keep picked to encourage more production of pods
