2021 Guidelines for onion thrips management

- **MOVENTO or SENSTAR**
  - 7-14 days
  - 0.6-1 thrips per leaf; prebulbing

- **MOVENTO or SENSTAR**
  - 1-2 thrips per leaf

- **OPTION A**
  - **AGRI-MEK SC**
  - 0.8-1 thrips per leaf

- **OPTION B**
  - **MINECTO PRO**
  - 3-5 thrips per leaf

- **OPTION C**
  - **RADIANT SC**

- **EXIREL**
  - ≥ 3 thrips per leaf
  - 0.8-1 thrips per leaf

- **RADIANT SC**
  - 1-2 thrips per leaf

- **LANNATE + WARRIOR**
  - 0.6-1 thrips per leaf; prebulbing

- **RADIANT SC**
  - 7-14 days

**Note:** The different colored boxes signify different IRAC classes and modes of action. Also, Agri-mek SC and Exirel should not be used in a sequence with Minecto Pro because that violates the label.

- Assumes 6 insecticide applications total in season
- Maximum of 2 applications of a product per season
- Assumes action threshold of 1 thrips per leaf, unless specified otherwise
